**Interior Architecture** John Kurtich, 1993 Interior Architecture John Kurtich Garret Eakin The School of the Art Institute of Chicago Increased specialization within the design professions has led to a growing separation of architecture, interior design, and the fine arts and limited the development of humanistic architectural space. This book of ideas helps to close this gap by explaining and illustrating principles of interior architecture that are based on a spatial point of view. The authors unveil the essence of ideas that generate physical form and space, as well as emphasize that interior architecture must be regarded as a union of disciplines. They focus on philosophical concepts that make up the history of interior architecture and juxtapose historical and modern examples to explain underlying design principles, exposing the links between art, architecture, and interior design. Particular attention is given to how fusion of interior architecture with other disciplines maximizes the potential of design to provide for human accommodation, comfort, and pleasure. Key topics discussed include three-dimensional development, respect for the enclosing architecture, sensitivity to human experience, the primacy of light and color, and furnishings as an extension of architecture. Case studies of historical, contemporary, and unbuilt examples reveal the reasons behind the creation of designs and the decision-making that accompanied execution of these designs. These examples provide insights into key specialties such as renovation, uses of the computer, and adaptive reuse. Quotes from artists, architects, and designers reinforce the philosophy revealed by the studies. Concepts from related fields such as physics, music, cinema, literature, painting, sculpture, and other fields are included to clarify the creative process. Among the important areas addressed are: The relevance of the fourth dimension as the most profound element of design How light as the quintessence of spatial definition has been used to define space by masters such as Le Corbusier, Kahn, Aalto, and Wright The evolution of retail, commercial, residential, and hospitality space from early examples to the present The emotional character of interior space established by color How furnishings in dialogue with the enclosure provide intimate human comfort How persisting styles express the spirit of the era More than 400 photographs, including 57 in color, offer a stunning visual exploration of path-breaking interior design ideas over the centuries. Far more than a history of the discipline, this guide offers powerful images and provocative ideas that stimulate new ways of thinking about interior design. It is an essential resource for all interior designers, architects, and students.

**Architecture and Interior Design** Buie Harwood, 2012 Combined and edited version of 2 separately published works:

Architecture and interior design through the 18th century, and Architecture and interior design from the 19th century.

*The Art of Interior Design* Victoria Kloss Ball, 1960

*Artistic Interiors* Suzanne Lovell, 2021-01-26 *Artistic Interiors* is an extraordinary volume featuring the work of prestigious architectural interior designer Suzanne Lovell. Hundreds of full color photographs feature her unique approach toward designing couture environments that create an expressive home through the integration of architecture, sophisticated materials, and fine art. Exploring more than a dozen residences, Lovell takes the reader on a journey through homes with sumptuous interiors, finely crafted details, and exceptional collections. A lifestyle architect practicing at the intersection of architecture and interiors, design and art, Lovell's work incorporates an expansive array of paintings, drawings, and photography, ceramics and sculpture, textiles, custom furnishings, and antiques. Suzanne Lovell is the go-to designer for the passionate collector and *Artistic Interiors* offers a glimpse into her distinct design process through striking images of her work. Praise for *Artistic Interiors*: "For Suzanne Lovell, a well-designed room serves as a frame for the art it displays. In more than twelve featured projects, Lovell tailors her aesthetic to highlight her clients' collections, resulting in graceful, harmonious spaces that are enhanced with works by Kara Walker, Vik Muniz, and Henri Matisse, among others."

—Architectural Digest "Perfect for gift giving; the holidays fast approach." —Ebony "An instant education in how art and furniture can live in harmony." —Chicago magazine "This book will have a special appeal to those looking for a sophisticated point of view in Midwestern abodes." —Library Journal --StartFragment-- "Although unmistakably modern, Suzanne Lovell's carefully detailed style has a classic quality, frequently incorporating antiques as well as furniture by early-twentieth-century luminaries. She displays whimsical folk art with as much sophistication and integrity as highly important works by celebrated artists, past and present, and the book's text is adept at explaining the thinking behind her designing." —House & Garden (UK) "The book—beautifully designed by Doug Turshen, with David Huang, using the work of a handful of photographers led by Tony Soluri—makes her mastery of dimension, volume, material, form, color, scale, period, and detail exceptionally vivid." —1stDibs.com "A sumptuous new volume by celebrated architect-designer Suzanne Lovell. Lovell offers intimate access to fourteen couture environments in which she has temptingly integrated architecture, materials, fine art, and the client's 'soul and sensibility.'" —Private Clubs

**Designing the French Interior** Anca I. Lasc, Georgina Downey, Mark Taylor, 2015-10-22 *Designing the French Interior* traces France's central role in the development of the modern domestic interior, from the pre-revolutionary period to the 1970s, and addresses the importance of various media, including drawings, prints, pattern books, illustrated magazines, department store catalogs, photographs, guidebooks, and films, in representing and promoting French interior design to a wider audience. Contributors to this original volume identify and historicize the singularity of the modern French domestic interior as a generator of reproducible images, a site for display of both highly crafted and mass-produced objects, and the

direct result of widely-circulated imagery in its own right. This important volume enables an invaluable new understanding of the relationship between architecture, interior spaces, material cultures, mass media and modernity.

**Sketching for Architecture + Interior Design** Stephanie Travis, 2015-07-20 The debate surrounding hand drawing versus computer-generated imagery has become a hot topic. Having grown up with computers, today's interior design and architecture students are extremely adept at creating computer imagery, but often lack confidence in their freehand sketching skills, or do not know how to sketch at all. Sketching, and the careful observation that it entails, is essential for the successful development of the next generation of designers. Forty-five step-by-step exercises take the student from the simple three-dimensional forms of furniture, to interiors, to complex building exteriors, and cityscapes. Technical topics covered include tools, line weights, perspective, proportion, composition, shading, serial views, and context. Exercises are illustrated with beautiful sketches specially created by the author. Sketching for Architecture + Interior Design is an indispensable and practical guide for students wishing to master the art of looking and sketching.

**Architecture and Interior Design from the 19th Century** Buie Harwood, Bridget May, Curt Sherman, 2009 Exceptionally comprehensive, this single-source reference provides a thorough examination of architecture, interiors, furniture and decorative arts from antiquity to the present. Flexible and easy-to-use, this well-organized text enables readers to content chronologically or topically and covers all aspects of architecture and design—from the built environment, to furniture, to decorative accessories. Using both narrative and illustrations, it interweaves design analysis language with art and architecture and offers a broad range of illustrations types including plans, sections and details. A companion to *Architecture and Interior Design Through the 18th Century: An Integrated History*, it provides a complete reference on design history for all.

**Indonesian Accents** Hock Beng Tan, 1999 Indonesia is one of the culturally richest regions of the world. This book is a celebration, albeit selectively, of the varied and rich qualities found in the tactile and sensual buildings, interiors and art works of the region - primarily through the works of a significant architectural and interior design practice, Grahacipta Hadiprana.

History of Interior Architecture Mark Hinchman, 2024-03-21 In today's globalized world, every aspect of our lives is affected by global interconnectedness from what we buy to what we eat to what we study – and the study of design history is no exception. Programs in art, architecture, and interior design are all facing the challenges of providing students with information from around the world. *History of Interior Architecture: Furniture, Design, and Global Culture*, Second Edition, (formerly titled *History of Furniture: A Global View*) covers the major historical movements in architecture, interior design, furniture, and the decorative arts from prehistoric periods through contemporary times, and it includes parts of the world that traditional history books ignore or underserve such as Africa, Asia, and Latin America. It presents, moreover, the

achievements of Western designers, not in isolation from the rest of the globe, but in vibrant contact with it. For example, students will learn about the influence of Islamic design on Romanesque style and Thailand's interpretation of Art Nouveau. In short, this comprehensive book with a global perspective focuses on the evolution of interior design from ancient history through deconstruction with lens on societal issues, like politics, economics, gender, technology, ethics, and sociology, in addition to history and aesthetics. FEATURES: - Highlights the contributions of women - Considers interior architecture in conjunction with other disciplines, including urban design, landscape design, graphic design, and fashion NEW TO THIS EDITION: - Focus on the 20th and 21st centuries, while streamlining earlier historical chapters, in accordance with the current curriculum - Discusses user-focused design, sustainability, and universal design - First edition to include online ancillary package with STUDIO features and Instructor Resources STUDIO Features Includes: - Self-assessment quizzes to test yourself on what you have just read - Visual and Vocabulary Flashcards of key terms and concepts covered in the book Instructor Resources - Instructor's Guide to help incorporate the text into your classroom - PowerPoint Slides for every chapter

*Architecture and Interior Design Through the 18th Century* Buie Harwood, Bridget May, Curt Sherman, 2002 For courses in History of Architecture, Interior Design, Furnishings, and Decorative Arts. Exceptionally comprehensive, this single-source text/reference allows students to compare and contrast architecture, interior design, interior architectural features, design details, motifs, furniture, space planning, color, lighting, textiles, interior surface treatments, and decorative accessories through many centuries from antiquity to the 18th century from the many regions of the world. Additionally, it includes later interpretations of architecture, interiors, and furniture to illustrate the evolution of each stylistic influence, and examples of costumes. The volume is extensively illustrated and features many diagrammed illustrations with explanatory notes highlighting specific design features.

*Art Nouveau* Charlotte Ashby, 2021-10-21 Art Nouveau presents a new overview of the international Art Nouveau movement. Art Nouveau represented the search for a new style for a new age, a sense that the conditions of modernity called for fundamentally new means of expression. Art Nouveau emerged in a world transformed by industrialisation, urbanisation and increasingly rapid means of transnational exchange, bringing about new ways of living, working and creating. This book is structured around key themes for understanding the contexts behind Art Nouveau, including new materials and technologies, colonialism and imperialism, the rise of the 'modern woman', the rise of the professional designer and the role of the patron-collector. It also explores the new ideas that inspired Art Nouveau: nature and the natural sciences, world arts and world religions, psychology and new visions for the modern self. Ashby explores the movement through 41 case studies of artists and designers, buildings, interiors, paintings, graphic arts, glass, ceramics and jewellery, drawn from a wide range of countries.

*The Art of Place* Lee Ledbetter, 2019-03-26 The first book from this celebrated American designer and architect known for creating spaces that balance historic detail and modern elegance. The work of architect and interior designer Lee Ledbetter represents a one-of-a-kind combination of traditional details and chic Modernism. Lee Ledbetter established his practice in New Orleans in 1996 and has developed a body of work that emerges from his ability to incorporate historical precedent as well as regional and environmental context, and his firm has received recognition for its expertise well beyond its Deep South roots. Ledbetter's interiors and architecture combine a cleanly tailored and bright modernity with the unapologetic embellishments of refined and luxurious decoration. Ledbetter strongly believes design to be a fine art along with painting and sculpture, and he considers placement and scale of furniture, artwork, and lighting as carefully as he does the creation of walls and the spaces they contain. As Mayer Rus, who provides the text for this title, once wrote in *House & Garden*, Lee Ledbetter rejects the idea that a serious architect cannot be a dedicated decorator as well.

**Interiors and Interiority** Ewa Lajer-Burcharth, Beate Söntgen, 2015-11-13 The book explores the historical connections between the notions of architectural interior, subjective space, human interiority, and represented space including virtual space. In the 18th century the notion of interiority understood as a paradigm of human subjectivity came to be articulated in a sustained way in architectural and visual, rather than only literary forms. While the notion of the interior and the processes of interiorization were, as Walter Benjamin demonstrated, the defining features of 19th-century bourgeois culture, it is the different forms of conceptual assault on, or deconstruction of interiority that define the approach to space and self in the 20th and 21st centuries. The book examines models of understanding interiority as these were developed in relation to notions of space and spatial experience.

**Atmosphere** Hanneke Kamphuis, 2007 A book that inspires and guides you through the key trends and influences for architecture and design. Not just another book on architecture and design, *Atmosphere* invites, encourages and motivates. The atmosphere is a useful and meaningful metaphor for the artistic climate that fills our lives and responds to our sensors. Here, too, one can distinguish various layers that can be analysed and reduced to the basic components of any creative effort: form, colour and material. This book explores seven atmospheric layers that not only exist simultaneously but - owing to their fleeting nature - can easily merge to form new combinations, over and over again. *Atmosphere* is a seven-part exploration of the themes that spark such work. It delves into a renewed interest in handicrafts, into creases and crinkles as generators of form, into nature as an inexhaustible source of inspiration. Learn how designers deal with the chill perfection of computer-aided design and how they counter a period of baroque extravagance. Each chapter is lavishly illustrated with recent work by top designers, architects and artists. Here's hoping the oxygen in *Atmosphere* will be pumped into future projects - including yours.

*Dreamscapes & Artificial Architecture* Alison Hugill, Rosie Flanagan, 2020 Digital renderings have long served architects

and interior designers to help visualize spaces before the building begins. But a new generation of digital artists are taking this craft a step further to create otherworldly scenes that can't, and won't, ever be built. This inspiring compilation of the most innovative projects in digital art covers the work of the artists and creatives at the forefront of this aesthetic. Discover Filip Hodas and his captivating pop culture dystopia artwork series, explore Massimo Colonna's surrealist urban landscapes and dive into the abstract compositions of Ezequiel Pini, founder of Six N. Five studio. Dreamscapes & Artificial Architecture presents the work of leading creatives from across the globe, exploring the infinite ways to conceptualize utopian oases and dystopian nightmares. With their roots in spatial design, their ideas present a new creative current defined by the fusion of digital techniques such as computer rendering and 3D art, and an aesthetic that moves between fantasy and reality. Freed from the constraints of the physical world, these dreamscapes expand the possibilities for architecture and interior design.

**Interior Design Since 1900** Anne Massey, 2008 From the Arts and Crafts movement to the present day - including discussions of Art Nouveau, Bauhaus, the Modern Movement and Art Deco through to Hi-Tech and green design - every style of interior since 1900 is charted in this concise, wide-ranging critical survey. Interior design in the twentieth century saw many changes in direction, all documented here, with the emergence of professional 'interior decoration' and its evolution into interior design. Interiors, domestic and other, are explored and placed within their social, political, economic and cultural context. This new and expanded edition is brought up to date with a chapter on sustainable design, focusing on public spaces such as hotels, offices, factories and shops.--BOOK JACKET.

Basics Interior Architecture 05 Russell Gagg, 2011-10-01 A focused and informative introduction to many of the materials used in the design of contemporary interior spaces. It also explores the use of sustainable materials.

**The Problem of the House** Alex Thomas Anderson, 2006 The Problem of the House will appeal to art and architectural historians, students and scholars of architecture, interior designers, and decorative artists.

William Morris and his Palace of Art Tessa Wild, 2018-11-30 William Morris and his Palace of Art is a comprehensive new study of Red House, Bexleyheath; the only house commissioned by William Morris and the first independent architectural work of his close friend, Philip Webb. Morris moved in to Red House as an ebullient young man of 26, with an independent income and a head brimming with ideas and the persistent question of 'how best to live? Red House, together with its Pre-Raphaelite garden, stands as the physical embodiment of his exuberant spirit, youthful ambition, passionate medievalism, creativity and great sense of possibility. For five intense years from 1860-5, it was a place of halcyon days - happy family life, loyal friendship, good humoured competition, and the jovial campaign of decorating; furnishing the house and designing the garden. Drawing on a wealth of new physical evidence, this book argues that Red House constitutes an ambitious and critical chapter in his design history. It will re-consider the inspiration it provided for the founding of 'the Firm' of Morris, Marshall, Faulkner & Co. (later Morris & Co.), in 1861, and the vital collaboration of Webb, Burne-Jones, Rossetti and their intimate

circle in realising Morris's dream for his house.

**Art Deco Interiors** Henry Delacroix, 2016-12-26 First published in Paris as *Decoration Moderne dans l'Interieur*, this rare 1935 portfolio of full-color plates reflects the influence of Art Deco modernism on architects and interior designers. Designs for every space include living rooms, dining rooms, bedrooms, bathrooms, offices, terraces, artists' studios, and other settings. Equally eye-catching are the lighting, chairs, tables, beds, bookcases, desks, accessories, and other furniture along with floor and wall treatments and additional elements of modernist interior design. Captions identify the creator of every design, and the book includes a translation of the original Introduction and a new Publisher's Note. This splendid collection of authentic, hard-to-find designs will provide a treasury of inspiration for architects, interior designers, and designers of furniture and accessories as well as collectors of authentic Art Deco material and students of design, architectural history, and popular culture.
