Embodied Metaphors in Film, Television, and Video Games Kathrin Fahlenbrach,2015-10-05 In cognitive research, metaphors have been shown to help us imagine complex, abstract, or invisible ideas, concepts, or emotions. Contributors to this book argue that metaphors occur not only in language, but in audio visual media well. This is all the more evident in entertainment media, which strategically sell their products by addressing their viewers' immediate, reflexive understanding through pictures, sounds, and language. This volume applies cognitive metaphor theory (CMT) to film, television, and video games in order to analyze the embodied aesthetics and meanings of those moving images.

Media and the American Child George Comstock, Erica Scharrer, 2010-07-27 Media and the American Child summarizes the research on all forms of media on children, looking at how much time they spend with media everyday, television programming and its impact on children, how advertising has changed to appeal directly to children and the effects on children and the consumer behavior of parents, the relationship between media use and scholastic achievement, the influence of violence in media on anti-social behavior, and the role of media in influencing attitudes on body image, sex and work roles, fashion, & lifestyle. The average American child, aged 2-17, watches 25 hours of TV per week, plays 1 hr per day of video or computer games, and spends an additional 36 min per day on the internet. 19% of children watch more than 35 hrs per week of TV. This in the face of research that shows TV watching beyond 10 hours per week decreases scholastic performance. In 1991, George Comstock published Television and the American Child, which immediately became THE standard reference for the research community of the effects of television on children. Since then, interest in the topic has mushroomed, as the availability and access of media to children has become more widespread and occurs earlier in their lifetimes. No longer restricted to television, media impacts children through the internet, computer and video games, as well as television and the movies. There are videos designed for infants, claiming to improve cognitive development, television programs aimed for younger and younger children-even pre-literates, computer programs aimed for toddlers, and increasingly graphic, interactive violent computer games. Presents the most recent research on the media use of young people Investigates the content of children's media and addresses areas of great concern including violence, sexual behavior, and commercialization Discusses policy making in the area of children and the media Focuses on experiences unique to children and adolescents

Translation Studies on Chinese Films and TV Shows Feng Yue,2023-01-02 This book explores translation strategies for

films and TV programs. On the basis of case studies on subtitle translations, it argues that translators are expected to take into consideration not only linguistic and cultural differences but also the limits of time and space. Based on the editor's experience working as a translator for TV, journalist, and narrator, this book proposes employing editorial translation for TV translation. Further, in light of statistics on international audiences' views on Chinese films, it suggests striking a balance between conveying cultural messages and providing good entertainment.

Connecting Sociology to Our Lives Tim Delaney,2015-11-17 Many introductory texts claim to make sociology relevant to student interests. Perhaps no other text has done this so completely - and engagingly - as Connecting Sociology to Our Lives. Tim Delaney not only uses popular and contemporary culture examples, he explains sociology thoroughly within the frame of the contemporary culture of students - a culture shaped by political, economic, and environmental trends just as much as by today's pop stars. This book will help academics to engage their students in sociology through the prism of their own culture. It involves students in critical thinking and classroom discussion through the book's many 'What Do You Think?' inserts, and will inspire them to careers with the book's unique chapter, 'Sociology's Place in Society: Completing the Connection'.
