Navigating Social Journalism Martin Hirst, 2018-10-17 Public trust in the once powerful institutions of the News Establishment is declining. Sharing, curating and producing news via social media channels may offer an alternative, if the difficult process of verification can be mastered by social journalists operating outside of the newsroom. Navigating Social Journalism examines the importance of digital media literacy and how we should all be students of the media. Author Martin Hirst emphasizes the responsibility that individuals should take when consuming the massive amounts of media we encounter on a daily basis. This includes information we gather from online media, streaming, podcasts, social media and other formats. The tools found here will help students critically evaluate any incoming media and, in turn, produce their own media with their own message. This book aims both to help readers understand the current state of news media through theory and provide practical techniques and skills to partake in constructive social journalism.

The Journalism Behind Journalism Gina Baleria, 2021-08-11 Today's journalists need to know both the skills of how to write, interview, and research, as well as skills that are often thought of as more intangible. This book provides a practical, how-to approach for developing, honing, and practicing the intangible skills critical to strong journalism. Individual chapters introduce journalism's intangible concepts such as curiosity, empathy, implicit bias, community engagement, and tenacity, relating them to solid journalistic practice through real-world examples. Case studies and interviews with industry professionals help to further establish connections between concept and practice, and mid-chapter and end-of-chapter exercises give the reader a concrete pathway toward developing these skills. The book offers an important perspective for the modern media landscape, where any journalist seeking to make an impact must know how to contextualize events, hold power to account, and inform their community to contribute to a healthy democracy. This is an invaluable text for courses in journalism skills at both the undergraduate and graduate level and anyone training the next generation of journalists.

Convergent Journalism: An Introduction Vincent F. Filak, 2014-10-30 Convergent Journalism: An Introduction is a pioneering textbook that will teach you how to master the skills needed to be a journalist in today's converged media landscape. This book shows you what makes a news story effective, and how to identify the best platform for a particular story, whether it's the Web, broadcast or print. The bedrock tenets of journalism remain at the core of this book, including information dissemination, storytelling, audience engagement. After establishing these journalism basics, the book goes into

great detail on how to tailor a story to meet the needs of various media. Vincent F. Filak has brought this second edition completely up to date through: A thorough reorganization of the chapters, which provides a newer, more practical approach focused on how to do convergent journalism, rather than simply observing the current state of converged media. A number of new pedagogical features to improve learning and retention, including examples, exercises, breakout boxes and more. Coverage of additional topics such as issues of law and ethics in digital media, and also writing for mobile platforms and social media. A companion website with links to additional examples of quality text, images and multimedia for students, as well as an instructor site with a test bank, suggested exercises and discussion questions.

The A to Z of Journalism Ross Eaman, 2009-10-12 Journalism is the discipline of gathering, writing, and reporting news, and it includes the process of editing and presenting news articles. Journalism applies to various media, including but not limited to newspapers, magazines, radio, television, and the internet. The word 'journalist' started to become common in the early 18th century to designate a new kind of writer, about a century before 'journalism' made its appearance to describe what those writers produced. Though varying in form from one age and society to another, it gradually distinguished itself from other forms of writing through its focus on the present, its eye-witness perspective, and its reliance on everyday language. The A to Z of Journalism relates how journalism has evolved over the centuries. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the different styles of journalism, the different types of media, and important writers and editors.

Investigative Journalism Hugo de Burgh, 2000 Investigative Journalism is a critical and reflective introduction to the traditions and practices of investigative journalism. It combines interviews with journalists, researchers, editors and television producers.

Rethinking Journalism Chris Peters, M.J. Broersma, 2013-05-07 There is no doubt, journalism faces challenging times. Since the turn of the millennium, the financial health of the news industry is failing, mainstream audiences are on the decline, and professional authority, credibility and autonomy are eroding. The outlook is bleak and it's understandable that many are pessimistic. But this book argues that we have to rethink journalism fundamentally. Rather than just focus on the symptoms of the 'crisis of journalism', this collection tries to understand the structural transformation journalism is undergoing. It explores how the news media attempts to combat decreasing levels of trust, how emerging forms of news affect the established journalistic field, and how participatory culture creates new dialogues between journalists and audiences. Crucially, it does not treat these developments as distinct transformations. Instead, it considers how their interrelation accounts for both the tribulations of the news media and the need for contemporary journalism to redefine itself.

Models of Journalism Peter Bro, 2018-04-09 *Models of Journalism* investigates the most fundamental questions of how journalists can best serve the public and what factors enable or obstruct them in doing so. The book evaluates previous scholarly attempts at modeling the function and influencing factors of journalism, and proceeds to develop a range of important new models that take contemporary challenges faced by journalists and journalism into account. Among these new models is the chronology-of-journalism, which introduces a new set of influencing factors that can affect journalists in the 21st century. These include internal factors – journalistic principles, precedents and practices – and external factors – journalistic production, publication and perception. Another new model, the journalistic compass, delineates differences and similarities between some of the most important journalistic roles in the media landscape. For each new model, Peter Bro takes the actions and attitudes of individual journalists as its starting point. *Models of Journalism* combines practice and theory to outline and assess existing theoretical models alongside original ones. The book will be a useful tool for researchers, lecturers and practitioners who are engaged with the ever-evolving notions of what journalism is and who journalists are.

Journalism and Democracy in Asia Michael Bromley, Angela Romano, 2012-10-12 *Journalism and Democracy in Asia* addresses key issues of freedom, democracy, citizenship, openness and journalism in contemporary Asia, looking especially at China, Japan, Korea, Indonesia, the Philippines and India. The authors take varying approaches to questions of democracy, whilst also considering journalism in print, radio and new media, in relation to such questions as the role of social, political and economic liberalization in bringing about a blooming of the media, the relationship between the media and the development of democracy and civil society, and how journalism copes under authoritarian rule. With contributions from highly regarded experts in the region examining a broad range of issues from across Asia, this book will be of high interest to students and scholars in political communications, journalism and mass communication and Asian studies.

Engaged Journalism Jake Batsell, 2015-02-03 *Engaged Journalism* explores the changing relationship between news producers and audiences and the methods journalists can use to secure the attention of news consumers. Based on Jake Batsell's extensive experience and interaction with more than twenty innovative newsrooms, this book shows that, even as news organizations are losing their agenda-setting power, journalists can still thrive by connecting with audiences through online technology and personal interaction. Batsell conducts interviews with and observes more than two dozen traditional and startup newsrooms across the United States and the United Kingdom. Traveling to Seattle, London, New York City, and Kalamazoo, Michigan, among other locales, he attends newsroom meetings, combs through internal documents, and talks with loyal readers and online users to document the successes and failures of the industry's experiments with paywalls, subscriptions, nonprofit news, live events, and digital tools including social media, data-driven interactives, news games, and comment forums. He ultimately concludes that, for news providers to survive, they must constantly listen to, interact with,

and fulfill the specific needs of their audiences, whose attention can no longer be taken for granted. Toward that end, Batsell proposes a set of best practices based on effective, sustainable journalistic engagement.

Local Journalism Rasmus Kleis Nielsen, 2015-06-30 For more than a century, local journalism has been taken almost for granted. But the twenty-first century has brought major challenges. The newspaper industry that has historically provided most local coverage is in decline and it is not yet clear whether digital media will sustain new forms of local journalism. This book provides an international overview of the challenges facing changing forms of local journalism today. It identifies the central role that diminished newspapers still play in local media ecosystems, analyses relations between local journalists and politicians, government officials, community activists and ordinary citizens, and examines the uneven rise of new forms of digital local journalism. Together, the chapters present a multi-faceted portrait of the precarious present and uncertain future of local journalism in the Western world.

Broadcast Journalism Andrew Boyd, Peter Stewart, Ray Alexander, 2012-11-12 This newest edition of *Broadcast Journalism* continues its long tradition of covering the basics of broadcasting from gathering news sources, interviewing, putting together a programme, news writing, reporting, editing, working in the studio, conducting live reports, and more. Two new authors have joined forces in this new edition to present behind the scenes perspectives on multimedia broadcast news, where it is heading, and how you get there. Technology is meshing global and local news. Constant interactivity between on-the-scene reporting and nearly instantaneous broadcasting to the world has changed the very nature of how broadcast journalists must think, act, write and report on a 24/7 basis. This new edition takes up this digital workflow and convergence. Students of broadcast journalism and professors alike will find that the sixth edition of *Broadcast Journalism* is completely up-to-date. Includes new photos, quotations, and coverage of convergent journalism, podcasting, multimedia journalism, citizen journalism, and more!

Principles of Journalism Harmony Ledger, 2020-09-08 The production and distribution of reports on recent events is referred to as journalism. It includes the methods of gathering information and using literary techniques. It uses various means of media such as print, television, radio, and the Internet. Journalism went through various changes due to the Internet and smartphones. It has several forms such as broadcast journalism, citizen journalism, investigative journalism, interactive journalism and photo journalism. Broadcast journalism is the journalism that is written or spoken for radio or television. Investigative journalism includes the in-depth reporting that uncovers the social problems that often lead to major problems being resolved. Interactive form of journalism is an online form that is presented on the web. Photojournalism focuses on telling true stories through images. This book attempts to understand the multiple branches that fall under the discipline of journalism and how such concepts have practical applications. The various sub-fields of journalism along with

technological progress that have future implications are glanced at in it. This book is an essential guide for both academicians and those who wish to pursue this discipline further.

Journalism and Conflict in Indonesia Steve Sharp, 2012-12-07 This book examines, through the case study of Indonesia over recent decades, how the reporting of violence can drive the escalation of violence, and how journalists can alter their reporting practices in order to have the opposite effect and promote peace. It discusses the nature of press freedom in Indonesia from 1966 onwards, considers the relationship between the press and politicians, and explores journalists' working methods. It goes on to outline in detail the communal wars in eastern Indonesia in the period 1999-2000, arguing that communication as much as physical preparations for violence were key to bringing about the wars, with journalists' rigid professional routines and newswriting conventions causing them to reproduce and enlarge the battle cries of those at war. The book concludes by advocating a development communication approach to journalism in transitional settings, in order to help journalists to counter the disintegrative tendencies of failing states and the communal strife that can result.

Journalism Tony Harcup, 2004 'Journalism' offers a wide-ranging introduction to journalism, which combines the experience and advice of practising journalists with insights gained by its academic study.

Investigative Journalism in China Jingrong Tong, 2011-01-20 In the framework of democratic societies, investigative journalism is deemed as serving the public interest, helping maintain a healthy public sphere and helping to hold power into account. The ideals of a democratic society justify the idea and practice of investigative journalism. Alternately, modern China runs an authoritarian system of the one-party rule, so where does the idea of investigative journalism fit in? Why can investigative journalism appear in such an authoritarian society and with what characteristics? Investigative Journalism in China examines the four aspects of Chinese investigative journalism (the Idea of investigative journalism and its comparison against Western contexts; the Development/Influence; Reporters and their work; and the Impacts on society), by using empirical data from Dr. Jingrong Tong's fieldwork at two newsrooms (the Southern Metropolitan Daily and the Dahe Daily) in 2006, 73 in-depth-interviews conducted from 2004-2008, and the analysis of internal and public documents and media cases in order to accurately survey the field and put it in context.

The American Journalist in the 21st Century David H. Weaver, Randal A. Beam, Bonnie J. Brownlee, Paul S. Voakes, G. Cleveland Wilhoit, 2009-03-04 An authoritative and detailed illustration of the state of journalistic practice in the United States today, The American Journalist in the 21st Century sheds light on the demographic and educational backgrounds, working conditions, and professional and ethical values of print, broadcast, and Internet journalists at the beginning of the 21st century. Providing results from telephone surveys of nearly 1,500 U.S. journalists working in a variety of media outlets, this volume updates the findings published in the earlier report, The American Journalist in the 1990s, and reflects the

continued evolution of journalistic practice and professionalism. The scope of material included here is extensive and inclusive, representing numerous facets of journalistic practice and professionalism, and featuring separate analyses for women, minority, and online journalists. Many findings are set in context and compared with previous major studies of U.S. journalists conducted in the 1970s, 80s, and 90s. Serving as a detailed snapshot of current journalistic practice, *The American Journalist in the 21st Century* offers an intriguing and enlightening profile of professional journalists today, and it will be of great interest and value to working journalists, journalism educators, media managers, journalism students, and others seeking insights into the current state of the journalism profession.

Network Journalism Ansgard Heinrich, 2011-04-26 Drawing on current theoretical debates in journalism studies, and grounded in empirical research, Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization. She argues that a new kind of journalism is emerging, characterized by an increasingly global flow of news as well as a growing number of news deliverers. Within this transformed news sphere the roles of journalistic outlets change. They become nodes, arranged in a dense net of information gatherers, producers, and disseminators. The interactive connections among these news providers constitute what Heinrich calls the sphere of network journalism.

The Undeclared War between Journalism and Fiction D. Underwood, 2013-09-25 In this volume, Doug Underwood asks whether much of what is now called literary journalism is, in fact, 'literary,' and whether it should rank with the great novels by such journalist-literary figures as Twain, Cather, and Hemingway, who believed that fiction was the better place for a realistic writer to express the important truths of life.
