The schools of thought represented are: Philosophical Theism, Reformed Epistemology, Wittgensteinianism, Postmodernism, Critical Theory and Process Thought.

**The Future of the Philosophy of Religion** M. David Eckel, C. Allen Speight, Troy DuJardin, 2020-10-12 This collection of essays on the philosophy of religion and its future brings together accomplished thinkers across several related fields, from comparative philosophy to analytic and continental philosophy of religion and beyond. Contributing authors address pressing questions including: Where does philosophy stand in relation to religion and the study of religion in the 21st century? How ought the philosophy of religion to interact with religious studies and theology to make for fruitful interdisciplinary engagement? And what does philosophy uniquely have to offer to the broad discourse on religion in the modern world? Through exploring these questions and more, the authors' goal is not that of meeting the philosophical future, but of forging it. Readers will enter a vivid conversation through engaging essays which demonstrate the importance of disciplinary openness and show that we do not need to sacrifice depth in order to achieve breadth. Modernity and postmodernity come together in a constantly evolving discussion that moves the philosophy of religion forward, while keeping an eye toward the experience accumulated in past centuries. This book will interest students of philosophy, theology, religious studies, and other fields that wonder about the place of philosophy and religion in today's world. It also has much to offer advanced scholars in these fields, through its breadth and forward thinking.

**Philosophy and the Turn to Religion** Hent de Vries, 1999-07-23 Only by confronting such uncanny and difficult figures, de Vries claims, can one begin to think and act upon the ethical and political imperatives of our day.--Richard Rorty, Stanford University MLN

*Philosophy of Religion* Tim Bayne, 2018 What is the philosophy of religion? How can we distinguish it from theology on

the one hand and the psychology/sociology of religious belief on the other? What does it mean to describe God as eternal? And should religious people want there to be good arguments for the existence of God, or is religious belief only authentic in the absence of these good arguments? In this Very Short Introduction Tim Bayne introduces the field of philosophy of religion, and engages with some of the most burning questions that philosophers discuss. Considering how religion should be defined, and whether we even need to be able to define it in order to engage in the philosophy of religion, he goes on to discuss whether the existence of God matters. Exploring the problem of evil, Bayne also debates the connection between faith and reason, and the related question of what role reason should play in religious contexts. Shedding light on the relationship between science and religion, Bayne finishes by considering the topics of reincarnation and the afterlife. Faith, Freedom, and Rationality Jeff Jordan, Daniel Howard-Snyder, 1996 The philosophy of religion, once considered a deviation from an otherwise analytically rigorous discipline, has flourished over the past two decades. This collection of new essays by twelve distinguished philosophers of religion explores three broad themes: religious attitudes of belief, acceptance, and love; human and divine freedom; and the rationality of religious belief.

An Introduction to the Philosophy of Religion Michael J. Murray, Michael C. Rea, 2008-03-20 An Introduction to the Philosophy of Religion provides a broad overview of the topics which are at the forefront of discussion in contemporary philosophy of religion. Prominent views and arguments from both historical and contemporary authors are discussed and analyzed. The book treats all of the central topics in the field, including the coherence of the divine attributes, theistic and atheistic arguments, faith and reason, religion and ethics, miracles, human freedom and divine providence, science and religion, and immortality. In addition it addresses topics of significant importance that similar books often ignore, including the argument for atheism from hiddenness, the coherence of the doctrines of the Trinity and the Incarnation, and the relationship between religion and politics. It will be a valuable accompaniment to undergraduate and introductory graduate-level courses.

God And The Universe Of Faiths John Hick,1988-02-09

*Renewing Philosophy of Religion* Paul Draper,J. L. Schellenberg,2017 This book is animated by a shared conviction that philosophy of religion needs to change: thirteen new essays suggest why and how. The first part of the volume explores possible changes to the focus of the field. The second part focuses on the standpoint from which philosophers of religion should approach their field. In the first part are chapters on how an emphasis on faith distorts attempts to engage non-western religious ideas; on how philosophers from different traditions might collaborate on common interests; on why the common presupposition of ultimacy leads to error; on how new religious movements feed a naturalistic philosophy of religion; on why a focus on belief and a focus on practice are both mistaken; on why philosophy's deep axiological concern should set much of the field's agenda; and on how the field might contribute to religious evolution. The second part includes a qualitative analysis of the standpoint of fifty-one philosophers of religion, and also addresses issues about humility needed in continental philosophy of religion; about the implausibility of claiming that one's own worldview is uniquely rational; about the Moorean approach to religious epistemology; about a Spinozan middle way between 'insider' and 'outsider' perspectives; and about the unorthodox lessons we could learn from scriptures like the book of Job if we could get past the confessional turn in recent philosophy of religion. The goal of the volume is to identify new paths for philosophers of religion that are distinct from those travelled by theologians and other scholars of religion.--Back cover.

The Philosophy of Religion on the Basis of Its History Otto Pfeleiderer,1888

*Outlines of the Philosophy of Religion* Hermann Lotze,2016-07-08 An excerpt from the INTRODUCTION. § 1. If religion were a normal product of the human reason alone, then philosophy would be the sole legitimate organ for determining and interpreting its content. If, on the contrary, it sprung from revelation, then reason alone would not be able, it is true, to have discovered it; but after it were in existence, it would still be necessary to show that its content is the adequate fulfillment for those religious needs which our reason is compelled to cherish, but would not be able of itself to satisfy. Even in this case, therefore, philosophy would have a work to accomplish by way of such authenticating. The assertion that the content of religion is a 'mystery' is not convincing. There can be many facts of religion of such sort that the possibility of their coming to pass may not admit of rational apprehension; and yet we should not without exception take offence at this. But a 'mystery,' the significance of which were not at least susceptible of definition, would be a mere curiosity devoid of all connection with our religious needs, and, on this account, an unworthy object of revelation. Finally, if religion were a morbid product of the human spirit, philosophy, even in that case, would find occupation. It would have to investigate psychologically and historically the conditions of the origin of this delusion, as well as the conditions of avoiding it in the future. The principal

object of the following reflections is connected with the first point of view above suggested: that is, we seek to ascertain how much of the content of religion may be discovered, proved, or at least confirmed, agreeably to reason. The two other points of view we subordinate to this. § 2. It is customary to demand faith in contrast with knowledge as the proper organ for the truths of religion. Such an assertion finds its most exact expression in the intimation that, in fact, even scientific cognition always rests ultimately upon 'faith'; that is to say, upon an immediate act of trust in certain absolutely simple and self-evident truths, which are neither in need of any proof, nor capable of it. An important distinction is overlooked in the above-mentioned view. All such ultimate, self-evident propositions, upon which our knowledge is founded, are general judgments, which do not tell us that anything whatever is or takes place, but which only declare what would exist or would have to take place, in case definite conditions occur; or - more concisely - they all merely express certain general rules, which we are obliged to follow in the combination of the content of our ideas. On the contrary, those propositions upon which the most special interest of religion depends, - for example, that God is, that He has created the world, that the soul survives death, etc., - are all of them declarative judgments, which assert a definite, particular fact. With respect to the before-mentioned general propositions, it may be understood that they are capable of being objects of our immediate insight or evidence; for they are nothing but expressions of the forms of activity, in which our reason according to its own nature must be exercised....

*Philosophy of Religion* William L. Rowe, 1989 What is the relationship between faith and reason? Find out in PHILOSOPHY OF RELIGION: AN INTRODUCTION. Because it's written to be easily understood no matter your background, this philosophy of religion textbook introduces you to the debate in a way you can understand. Whether it's the philosophical proofs for God's existence or using reason to evaluate faith claims, the major points in the philosophy of religion are all covered in this excellent textbook. And with its built-in study tools, PHILOSOPHY OF RELIGION: AN INTRODUCTION helps out during test time as well.

**Issues in Contemporary Philosophy of Religion** Eugene Thomas Long, 2001-11-30 This collection of original articles, written by leading contemporary European and American philosophers of religion, is presented in celebration of the publication of the fiftieth volume of the International Journal for Philosophy of Religion. Following the Editor's Introduction, John Macquarrie, Adriaan Peperzak, and Hent de Vries take up central themes in continental philosophy of religion. Macquarrie analyzes postmodernism and its influence in philosophy and theology. Peperzak argues for a form of universality different from that of modern philosophy, and de Vries analyzes an intrinsic and structural relationship between religion and the media. The next three essays discuss issues in analytic philosophy of religion. Philip Quinn argues that religious diversity reduces the epistemic status of exclusivism and makes it possible for a religious person to be justified while living within a pluralistic environment. William Wainwright plumbs the work of Jonathan Edwards in order to better understand debates

concerning freedom, determinism, and the problem of evil, and William Hasker asks whether theological incompatibilism is less inimical to traditional theism than some have supposed. Representing the Thomist tradition, Fergus Kerr challenges standard readings of Aquinas on the arguments for the existence of God. David Griffin analyzes the contributions of process philosophy to the problem of evil and the relation between science and religion. Illustrating comparative approaches, Keith Ward argues that the Semitic and Indian traditions have developed a similar concept of God that should be revised in view of post-Enlightenment theories of the individual and the historical. Keith Yandell explores themes in the Indian metaphysical tradition and considers what account of persons is most in accord with reincarnation and karma doctrines. Feminist philosophy of religion is represented in Pamela Anderson's article, in which she argues for a gender-sensitive and more inclusive approach to the craving for infinitude.
